SEARCH TIPS 3

Boolean searches

You can use the Boolean Operators AND, OR and NOT within search fields. By default an AND relationship is assumed between search terms unless another operator is specified.

Searching for authors

To search for multiple authors, separate each author name with either AND or OR. Using AND will search for content that has been co-authored by the authors. Using OR will search for content that has been authored by either of the authors.

Searching for phrases

Enclose your search term with quotation marks to search for an exact match of that phrase. Without quotation marks, articles including all of the search terms somewhere in the article will be listed. For example searching for "civil war" will find articles containing that exact phrase.

Wildcards

Search

1. 키워드 검색 (해당 저널 or 모든 저널)
 2. 상세 검색으로 이동
 3. 불리안 검색, 저자명 검색, 구 검색, 와일드카드 등 검색팁 제공
